### Description

Please call us for all information and details on this machine.

### Additional Information

<b>Physical Appearance</b>
AFEquip.com is not responsible for hidden damages or mechanical failures as this is only a visual inspection

**Mechanical Detail**

The images in the grid show a yellow CAT 1405 crawler crane on a snowy field. The first three images (1-3) show the crane from different angles: front, side, and rear. The fourth image (4) is a close-up of the machine's identification plate, which includes the following information:

- TYPE: CAT 1405
- Bucyrus International, Inc. REG. U.S. PAT. & TM. OFF. SOUTH MILWAUKEE, WI, USA
- SERIAL NUMBER: 14147
- CAB PART NUMBER: 5097100
- TESTED TO ISO 3449 LEVEL II, ISO 10545 CLASS 1, SPECIFICATIONS J1586
- FOPS CERTIFICATION NUMBER: TR1001
- MANUFACTURED BY: CAT SOUTH AFRICA, 877 BROADWAY, WILSON, WI 53091

The remaining images (5-16) show various views of the crane's cab, including the operator's seat, the control panel, and the machine's identification plate. The operator is wearing a hard hat and a high-visibility vest. The crane is shown lifting a large, heavy object from the snow.

A 4x4 grid of 16 photographs documenting the assembly or operation of a yellow CAT 7000 crawler crane in a snowy environment. The images show various components and full views of the machine. The first three rows contain close-up shots of structural elements, including the boom, lattice, and counterweights, as well as details of the hoist and cable systems. The fourth row shows the crane from a distance, highlighting its large size and the 'CAT 7000' branding. The final row shows the crane lifting a large, heavy component, likely a counterweight or boom section, using its main hoist system. The background is consistently a snowy, open area, suggesting a construction site in winter or a high-altitude location.
